

Throughout the summer term, we will be thinking about what we have achieved during our time at Oakley and the memories we will be taking with us to secondary school.

In Art, the children will be creating a piece of artwork that represents them and is unique to their personality, linking it to our P4C unit.

As part of our history unit, we will be having a project week linked to the Mayan topic in the early part of the summer term.

The Spirit of Adventure

In maths, we will be continuing to practise our problem solving and reasoning skills through algebra, fraction and decimal, shape, data, probability and measure problems.

What has my adventure been so far?

Where is my adventure going to take me next?

In Science we will be looking at human relationships and changes in the body.

In English, we will be looking at the characters Ellie and Carl and finding out about who they are and what their life ambitions were. As part of the English, we will be writing in role as Ellie and thinking about how we could write her biography. During this time we will also be developing our grammar, punctuation and spelling accuracy.

Using our reflections on our time at Oakley, we will also be writing our own autobiography; spending time thinking about what makes each of us unique.

We will be taking part in a joint writing project with another local school, swapping writing and giving peer feedback on our different written pieces.
